

Factsheet

WERO

Tip Can be combined with Buckaroo PayperEmail and Buckaroo's Credit Management solution.

Introduction

Wero is a new payment method that will be rolled out across multiple Eurozone countries. At the end of 2025, Wero began rolling out the e-commerce variant in Germany. In 2026, this rollout expands to Belgium, France and Luxembourg. The transition from iDEAL to Wero in the Netherlands will be completed by 2027.

Behind Wero are the major German, French, Belgian and Dutch banks as well as two European payment processors. Since it is a new payment method, banks will work actively on driving adoption among both consumers and businesses. The ambition is for Wero to become 'the payment method' of Europe.

Payments are processed via the Wero wallet and debited directly from a bank account. This wallet may later be used for loyalty and other functionalities.

Most banks will offer Wero within their own mobile banking apps, while some will use a generic wallet app.

BUCKAROO

Wero payment process

For the payer

How does it work?

You can shop online using a computer or a mobile device. In both cases, select Wero at checkout. On your mobile device, you will see a list of banks. Select your bank and log in to your banking app. You will see the transaction that needs to be approved.

On the computer, a Wero QR code will appear on your screen. Log in to your banking app on your mobile device. Scan the QR code with your phone. You will see the transaction that needs to be approved.

Benefits of Wero (via Buckaroo)

- Starts in Germany, available in Belgium, France, and Luxembourg from 2026; the Netherlands follows in 2027.
- Additional options such as QR-code invoices, subscriptions, pay later and loyalty.
- Less error-prone due to pre-filled payment details.
- Secure payments using strong authentication.
- Refunds are processed instantly.
- Direct payment method.
- Contract and payout handled via Buckaroo.

Integration

Wero is available through the Buckaroo API and all Buckaroo-supported plugins.
